

Electric Transmission and Distribution Services

For fast and easy connection to the region's single source for planning, engineering, project management, construction and maintenance, plug into On Target's Construction division. We're structured to handle T&D and substation projects of all sizes and degree of complexity – cost effectively, correctly and safely.

Depending on the scope and nature of the project, we'll provide design-build turnkey construction, act as a prime contractor, or serve as a subcontractor. All services are provided by highly skilled and motivated people with many years of experience in the electric utility industry.

From point of generation to extra high voltage, though substations and switchgear...from subtransmission and primary distribution to low voltage distribution serving homes, businesses and other end users, our reputation continues to grow by our service to numerous electric utilities and private concerns in the Northeast.

Electric T&D is the business where our company has its roots, and we still do it better than the others because we listen carefully to your needs. Whether it's a new installation, maintenance of existing plant or assisting with storm restoration efforts, we're the single source you need to get the job done right – on time and on budget... that's the On Target way.

Transmission

34.kV to 115kV
Design and build
Stringing and reconductoring
Pole and structure placement
Fiber and structure placement
Fiber optic static wire placement
OPGW or ADSS
XARM inspection
Phase Raising

Distribution

Primary and secondary voltages
from 120/240v to 34.5kV
Installation, transfer and removal
Live line maintenance
34.5Kv stick or rubber glove method
Voltage conversions and cut-overs
Reconductoring
Splicing and terminating
Transformer installation

Substation

Complete turnkey application
from concept to completion
Equipment placement
Site preparation / foundations
Buswork construction
Control wiring
System testing
Temporary feed hookups

Engineering and Design

Field survey / site analysis
Engineering specifications
Construction prints
CADD drawings
Detailed work diagrams
and instructions
Bid package preparation
Cost estimates

Professional Services

Scheduling
Quality assurance
Bid solicitation &
evaluation
Construction supervision &
inspection
Contract compliance

Underground Services

Concrete work
Manhole and handhole
Duct bank construction
Innerduct installation
Earthwork
Wire pulling & splicing
Manhole surveys

Additional Services

Pole, guy & anchor setting
Utility line locating
One call ticket software
Ledge boring
Strand and lash cable installation
Fiber and copper splicing & testing
