

Telecommunications Services

As the information revolution surges forward at warp speed, On Target is ready with a full line of aerial and underground services to meet the diverse needs of the telecommunications giants, independent phone companies, internet service providers and cable TV industry.

We make outside plant construction easier, faster and more efficient with true turnkey installation and upgrades. We are well equipped to handle every aspect of the project from survey; route planning and design of your fiber project; to construction, maintaining or upgrading your outside plant; to providing testing and splicing services for your fiber optic networks.

With multi-discipline professionals who know their trades and the region inside and out, we can run fiber anywhere: For single or multi site, for one block or multi miles, from new installation or overlashing in communications space, to installing All Dielectric Self Supporting (ADSS) or Optical Fiber Ground Wire (OPGW) cable in electric space. We go the extra mile to handle your underground or aerial communication project with site-specific projects or turnkey packages.

Construction – Aerial and Underground

Installation / Removal / Maintenance / Emergency
Electrically qualified – Distribution and Transmission
Existing and New Duct
Communication Space
Strand and Lash
Overlashing
